

PORTABLE 100x100

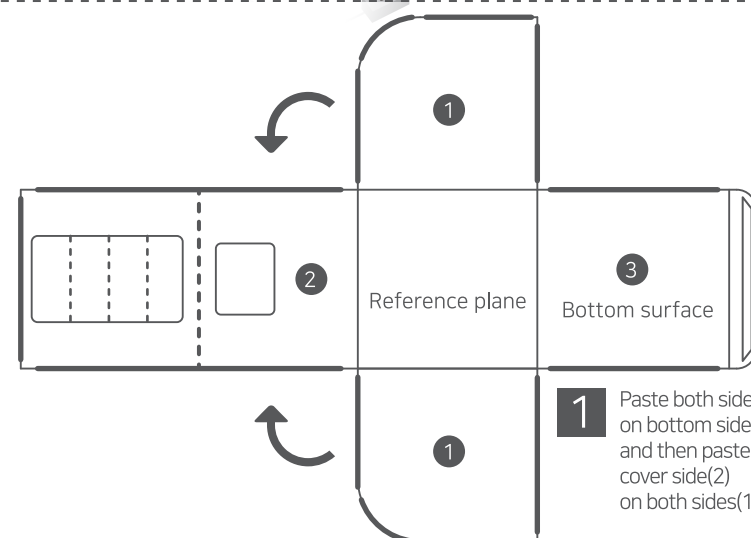

Mini Portable Photostudio

mini LED STUDIO BOX

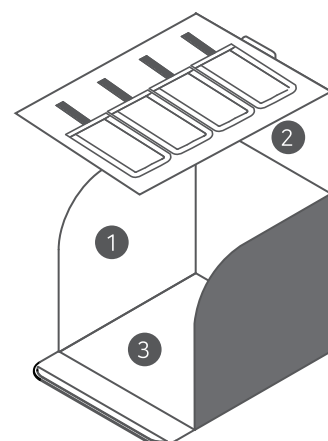

- It help you get clear picture for the subject with your DSLR Camera & smartphone.
- create the adjustment of brightness and warm atmosphere with LED controler & LED light.
- This mini studio can be bent and folded like a newspaper without the damage of LED lamp.
- Simple installment with velcro attached in 2 ~3 munites.
- high- quality silver embossing panel
- The light diffuser efficiency is good, The diffused reflection let light loss reduce
- It makes 6 LED lamp bar light up equally without shade.

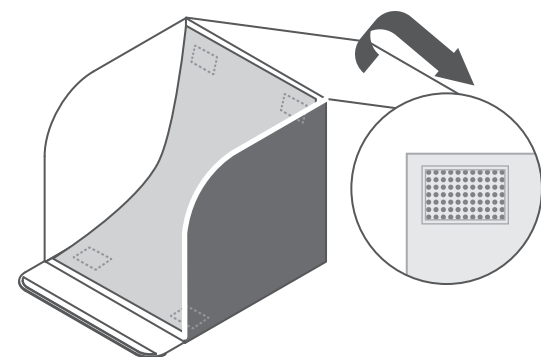

▲ Easy to carry and store for folding way like slim bag

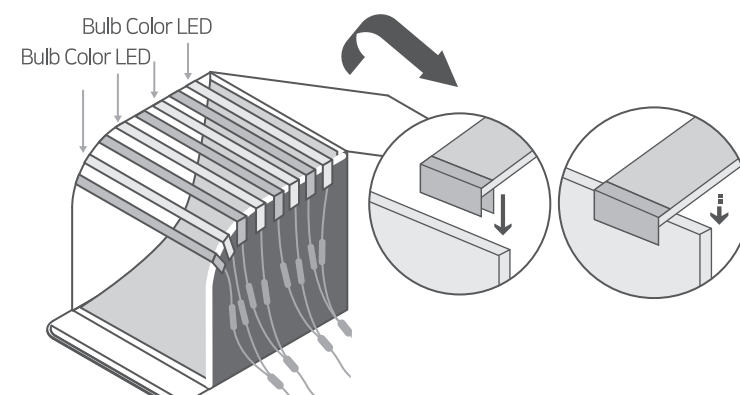

1 Paste both sides(1) on bottom side(3) and then paste top cover side(2) on both sides(1)

2 With velco, paste ministudio and background pad

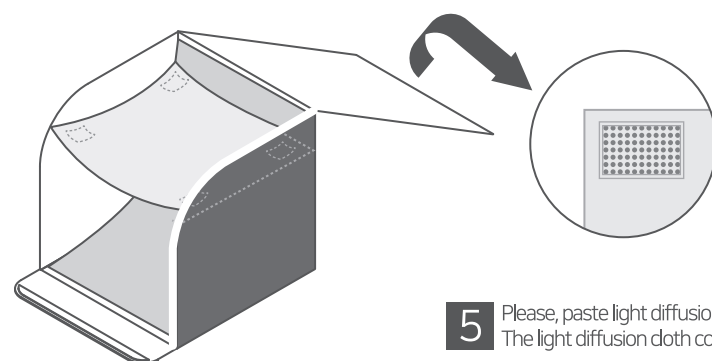

3 Hang the U hole of LED Lamp on the top of ministudio

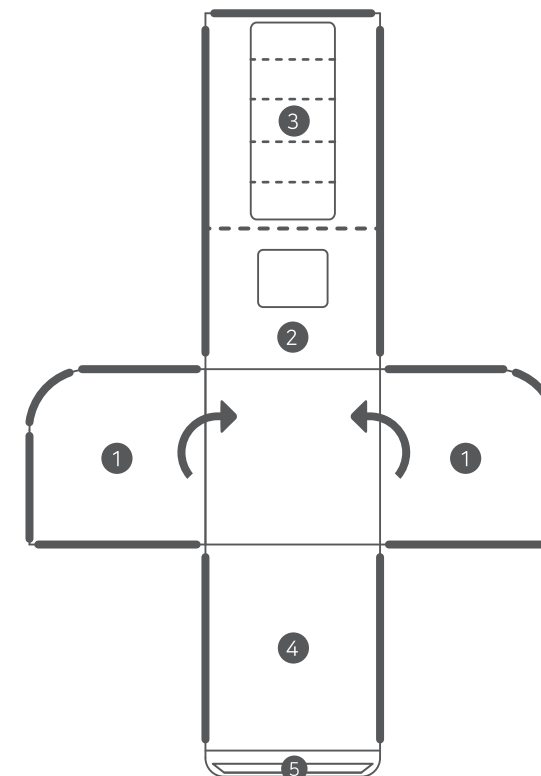

4 With LED controler, Possible to control the brightness of LED lamp Right to brighter, Left to darker

※Caution : We don't recommend the usage of Light diffusion cloth, except Reflective products(subject) Due to there would be the loss of light with using light diffusion cloth.

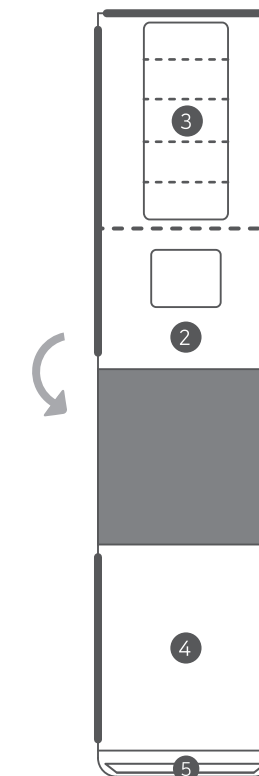

5 Please, paste light diffusion cloth on velcro tape in the both side of studio. The light diffusion cloth could be pasted on studio, only if necessary.
